Summary

Self-motivated **B.Tech Computer Science and Engineering** student at **MEA Engineering College, Malappuram**. Passionate about developing practical and user-friendly software solutions with an interest in **full-stack development, front-end development, and backend systems**. Skilled in **HTML, CSS, Bootstrap, JavaScript, React.js, TypeScript, Node.js, Express.js, NestJS, C#, and databases**. Completed a **15-day Front-End Web Development Internship** at **CoreMicron Enterprises LLP**, gaining practical experience in responsive website development and ERP invoice modules. Seeking an **entry-level software development or full-stack development role** to apply technical skills, contribute to real-world projects, and grow professionally.

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, C#

Frontend Technologies: HTML, CSS, Bootstrap, React.js, Vite, Tailwind CSS

Backend Technologies: Node.js, Express.js, NestJS, C# .NET

Databases and ORM: SQL, MongoDB, PostgreSQL, SQLite, Prisma ORM

Development Tools: Visual Studio Code, Git, GitHub, Docker

Other Technologies: REST APIs, WebSockets, Playwright

Internship

Front-End Web Development Intern - *CoreMicron Enterprises LLP*, Kottakkal, Kerala, India

June 2026

- Completed a Front-End Web Development Internship at CoreMicron Enterprises LLP.
- Gained practical experience in developing responsive and user-friendly web pages.
- Worked with HTML, CSS, Bootstrap, and JavaScript for front-end development.
- Gained exposure to ERP invoice module development and web application customization.

Projects

HospitalOS

Technologies: React.js, TypeScript, Vite, Tailwind CSS, NestJS, Prisma ORM, PostgreSQL, SQLite, C# .NET 8

- Developed a modern healthcare and hospital ERP platform integrating clinical, administrative, financial, and operational workflows.
- Implemented modules for patient management, appointments, emergency care, pharmacy, inventory, billing, and nursing.
- Added role-based access control, audit logging, reporting features, and secure patient-level data management.

Inventory Management System

Technologies: React.js, Vite, Node.js, Express.js, MongoDB, REST APIs

- Developed a web-based inventory management system for managing products, stock, customers, and sales.
- Implemented POS billing with GST calculation, invoice generation, barcode/QR scanning, and inventory monitoring.
- Added role-based access for Admin, Manager, and Cashier users along with sales analytics and audit logs.

AI-Based Resume Screening and Candidate Ranking System

Technologies: Python, Natural Language Processing, Machine Learning

- Developed an AI-based system to screen resumes and rank candidates according to job requirements.
- Applied resume text processing and keyword-based analysis to identify relevant candidate skills and qualifications.
- Generated candidate rankings to support faster and more efficient recruitment decisions.

Certificates

Digital 101 – 30 Hours

FutureSkills Prime – NASSCOM

May 2025

Certificate Course in Cyber Awareness AI Basic

NIIT Foundation – Cyber Suraksha Plus Program

August 2026

Foundations of AI: Principles, Applications, and Future Trends

Additional Skill Acquisition Programme (ASAP Kerala) in collaboration with 360 DigiTMG

Education

MEA Engineering College, Malappuram, Kerala, India

2024 – Present

- B.Tech in Computer Science and Engineering
- Currently pursuing third year

GHSS Kadungapuram, Malappuram, Kerala, India

2022 – 2024

Higher Secondary (Biology Science)

G.H.S.S Kadungapuram, Kerala, India
